Adviza Service

Our students all benefit from access to advice and guidance from highly qualified career professionals. This is provided through the Adviza Service and we are required to register students by providing the name and address of students and their parents/carers. It may be that other relevant information is passed to Adviza. Parents/carers can request that no information beyond the name and address is passed on. Students aged over 16 years can request this themselves. Contact should be with the Data Protection Officer via office@stbarts.co.uk to opt out of this arrangement.
